PREFACE

I, [Author], confirm that the work presented in this thesis is my own. Where information has been derived from other sources, I confirm that this has been indicated in the thesis.

All the work described in this thesis was carried out in the [Department – University], under the supervision of [Supervisor]. This dissertation is my own work and contains nothing which is the outcome of work done in collaboration with others except as specified in the text and summarised in the Statement of Contributions.

This dissertation is not substantially the same as any that I have submitted, or is being concurrently submitted, for a degree or diploma or other qualification at [University] or any other University or similar institution except as declared in the Preface and specified in the text. It does not exceed 100,000 words, including footnotes, tables, and figures but excluding bibliography, appendices, and supporting data.

ACKNOWLEDGEMENTS

Acknowledge all the things!

Dedication (if you so desire)

ABSTRACT

My research is about stuff. It begins with a study of some stuff, and then of some other unrelated stuff but better. It does not really end. But really, it is of the utmost importance.

No more than 300 words.

IMPACT STATEMENT

The [Impact Statement](#) should be placed immediately after the abstract page in the thesis, before the table of contents. The statement should describe how the expertise, knowledge, analysis, discovery, or insight presented in your thesis could be put to a beneficial use. Consider benefits both inside and outside academia and the ways in which these benefits could be brought about.

No more than 500 words.

STATEMENT OF CONTRIBUTIONS

The work presented in this thesis would not have been possible without the contributions of many brilliant people, to whom I am very grateful. Due to the collaborative and interdisciplinary nature of this project, some of the data presented was acquired with the help of other people. These people are: **Dr. X**, and his lab members **Dr. Y**, **Dr. Z**, and **Best Student Ever**. All experiments in this thesis were conceived and designed by my PhD supervisor, Dr. X and me, with additional input from the other investigators for the particular experiments they contributed to.

In the following I state the contribution of other people to the data presented by chapter:

Chapter 2: Dr. X contributed computational modelling. Dr. Y assisted with preliminary experiments and analysis.

Chapter 3: Some experiments were performed with the assistance of Best Student Ever.

Chapter 4: I performed all the experiments, Dr. Z did all the analysis.

Chapter 5: Dr. Y performed the experiments and the majority of the analysis, which I contributed to.
